SUMMARY

- I have been working as a frontend developer for **over 4 years**, specializing in React Native, ReactJS, NextJS, AngularJS, TailwindCSS, SASS, JavaScript, TypeScript, Node.js, MongoDB and GraphQL. I have also ventured into the realm of web3. I possess a decent understanding of connecting with blockchain networks and working with cutting-edge technologies like Ethereum and Smart Contracts.
- After graduating in September 2019, I began my professional journey by working on application products for nail services. Since September 2020, I have been involved in developing various applications and websites.
- Programming is my passion, and I strive to enhance my skills every day. I am dedicated to deepening my understanding of new technologies, Design Patterns, Object-Oriented Programming (OOP), software design, time management, and testing. My goal is to become a Software Architect before the age of 35.
- Some of my favorite renowned engineers include Tonny Sangha, JavaScript Mastery, Indian software engineers, and Pham Huy Hoang.

- One of my favorite quotes is, "There is no question that doesn't have an answer, you just haven't discovered it yet."
- I believe in being proactive at work, taking responsibility for my tasks, and ensuring that my actions do not negatively impact others.
- I always strive to complete tasks promptly and efficiently.
- I value open communication and actively express my opinions on work and teamwork.
- Punctuality is important to me, and *I strongly dislike being late*.

SKILLS

Backend:

- NodeJS (Express)
- MongoDb, GraphQL.

Frontend:

- HTML/CSS, TailwindCSS, Material UI, Antd, CharkaUI.
- Javascript, Typescript.
- ReactJS, React Native, AngularJS, NextJS.

Blockchain:

- Using Web3, EtherJS on ReactJs, React Native.
- Connect contract.

Database, Tech stack:

- MongoDB.
- Cloud services intergration: Google Cloud (Firebase).

EDUCATION

Cao Thang Technical College   Sep 2016 – Sep 2019

Information Technology / Software engineering

Degree classification: Good

Mode of study: Full-time

WORK EXPERIENCE

Tien Tien Company.   Sep 2019 – Sep 2020

Tien Tien Company is a product company that makes nail management applications.

Frontend Developer

- Participate develop (build, maintain) applications Android/IOS nail management (4 apps).
- Integrated Firebase FCM.
- Can do a project by yourself.
- Improve ability to do a project by myself.
- Improve research skill.

Rooxim Computer Science.   Nov 2020 – May 2021

ROOXIM INC, *a Japan based company, develops various kinds of mobile and web applications.*

Frontend Developer

- Participate develop (maintain, improve) applications Desktop, website internal management of company.
- PeerJS.
- Improve research skill.
- Improve testing skill (Unit tests).
- Improve English skill.

Backend Developer

- NodeJS, Express.
- MongoDB.
- Firebase.

Renovation Technology (RNT)

RNT is one of few companies dedicates to develop, customize and integrate the complex enterprise.

Technology Consulting
Custom software development
Mobile App Development - Offshore Development
Infrastructure
Internet of Things (IoT)
Mini-Games Builder
Marketing

Frontend Developer

- Participate develop (build, maintain, develop, fix errors) applications, website using React Native, ReactJS, AngularJS and Smart Contract.
  (2 apps, 3 websites, 1 website blockchain with Smart Contract - present).
- **Improve research, self-study skill**.
- Participate in a project that uses Smart Contract and try to improve.
- Self-study NextJS.
- Enhance, fix, and improve project performance.
- Improve UI skill.
- Improve Web3/Ethers to integrate blockchain smart contract (new to learning Solidity).
- Good UI using TailwindCSS, MUI,…

LUCKY TECH   Apr 2022 - Present

LuckyTech - Your Web3 and Blockchain Solutions Partner. Empowering businesses with cutting-edge blockchain technology, software development, design, and Web3 solutions. Revolutionize your industry with LuckyTech's expertise in Web3 and drive innovation in your business.

Blockchain

Mobile App Development

Web App Development

Outsource

Frontend Developer

- Participate develop (build, maintain, develop, fix errors) applications using React Native, ReactJs, NextJs, NodeJs, Web3, Ethers, SUI chain, BNB Chain.

PROJECT HIGHLIGHT

Lucky Tech Company **(React Native, ReactJs, NextJs, Web3, NodeJs, MongoDb, GraphQL)**

Open World NFT (BSC Chain)

- **Description:**
  Build Your Collection Today on the NFT Marketplace, power by BSC Network.
- **Responsibilities:** Build, Improve, fix errors, make new UI.
- **Results:** Successfully with business requirements.

Desui Decentralized Platform (SUI chain)

- **Description:**
  Where Web3 early supporters and decentralized hunters get on SHIPs before it hits the moon.
- **Responsibilities:** Build, Improve, fix errors, make new UI.
- **Results:** Successfully with business requirements.

Lucky Game (Web3, Ethers, ReactJS, Nodejs)

- **Description:**
  From only 1$, choose 1 number from 00-99 for a chance of x3 rewards.
- **Responsibilities:** Build, Improve, fix errors, make new UI.
- **Results:** Successfully with business requirements.

EMOVES (Move to earn)

- **Description:**
  EMOVES is a cutting-edge Web3 fitness and M2E (Move to Earn) app designed to make adopting a healthier lifestyle effortless. By joining EMOVES, you gain access to a vibrant community where you can exercise alongside friends and engage in exciting challenges that not only improve your well-being but also boost your earnings.
- **Responsibilities:** Improve, fix errors, make new UI.
- **Results:** Successfully with business requirements.

LEAPFIT (Move, fitness, social, NFTs)

- **Description:**
  LEAPFIT is a Web3, move, fitness, social and NFTs.
  Move and get gift free from our partner.
- **Responsibilities:** Improve, fix errors, make new UI, new features.
- **Results: Processing**.

Tien Tien Company (React Native, Redux, ReduxSaga, Firebase)

CComPos (This app manager nail store)

- **Description:**
  + Manager Time make nail with Timer Device
  + Manager Technician with Turner Device
  + Book appointment for customer
  + Payment
  + Report for nail store' owner
- **Responsibilities:** Improve, fix errors, make new UI, integrated Firebase FCM with business requirements.
- **Results:** Successfully with business requirements.

CComTek (This app for technician in nail store)

- **Description:**
  + Manager technician job
  + Manager technician appointment
  + Call receptionist for help
  + Report for employee
- **Responsibilities:** Improve, fix errors, make new UI, integrated Firebase FCM with business requirements.
- **Results:** Successfully with business requirements.

CComKiosk (This app for customer check-in nail)

- **Description:**
  + Choose nail service
  + Choose technical
- **Responsibilities:** Improve, fix errors, make new UI with business requirements.
- **Results:** Successfully with business requirements.

CComSales (This app manages account of nail store)

- **Description:**
  + Create account
  + Edit account
  + Delete account
  + Choose features
  accounts used to login CComPOS, CComTek, CComKiosk app.
- **Responsibilities:** Improve, fix errors, make new UI with business requirements.
- **Results:** Successfully with business requirements.

Rooxim Computer Science (ReactNative, Redux, ReduxSaga, Firebase, PeerJS)

- Mainly develop internal applications and internal website.
- Self-study, improve React Native, Redux, ReduxSaga, Redux-toolkit, Firebase, PeerJS.
- Unit tests, mocking test.
- Improve English skill.
- Improve work and time management skill.
- Good time for job and good people.

Renovation Technology (RNT) (React Native, ReactJs, NextJS, AngularJS, Smart Contract, Firebase, TaiwindCSS,…)

OBC Smart App

- **Description:** Connect and build a Vietnamese business community with knowledge, direct, successful business, and solid development.
- **Responsibilities:** Improve, fix errors, make new UI with business requirements.
- **Results:** Successfully with business requirements.

RNT Webiste (AngularJs, TailwindCSS)

- **Description:** The website introduces the company as a whole as well as the technologies.
- **Responsibilities:** Improve, fix errors, make new UI with business requirements.
- **Results:** Successfully with business requirements.

FMan Website (ReactJS, TailwindCSS)

- **Description:** The website introduces the company as a whole as well as the technologies.
- **Responsibilities:** Improve, fix errors, make new UI with business requirements.
- **Results:** Successfully with business requirements.

NFT Website – not released yet – improve (ReactJS, Solidity, Web3/Ethers, Metamask)

- **Description:** Blockchain NFT Market place, game NFT.
- **Responsibilities:** Improve, fix errors, make new UI with business requirements.
- **Results:** Successfully with business requirements.

With this project: *self-study, understand how to use Solidity, Web3/Ethers, Smart Contract, NFT Marketplace.*
